ENVIRONMENTAL POLICY

5E RESOURCES SDN BHD shall establish and evaluate achievable environmental performance goals to ensure continual improvement of its EMS through the following scopes:

- To ensure and maintain awareness of a sustainable environment within the working environment to ensure a healthy ecology and minimize the environmental impact.
 - To commit and ensure the prevention of environmental pollution and protect the environment.
 - Compliance with government regulations associated with hazardous waste management and environmental requirements.
 - Taking immediate action to review the policy, including the objectives and target based on continual risk assessment findings and environmental impact assessment.
 - Implementing continuous improvement on documentation and maintenance for the environmental management system (EMS).
 - Emphasizing and maintaining the environmental awareness of our employees and other parties, such as the public, customers, suppliers, and contractors, through continuous upgrades on knowledge, education, and publicity.
 - To manage the environmental system by guided self-regulation.
